ExeRunner Full Version [Mac/Win]

ExeRunner helps you run WiX commands on a computer that is a part of a Burn bundle install. Features: - Windows installer executable (EXE) file - can be used in command line mode - can be used with any WiX command - process selection at the beginning of a bundle install and/or at the end of a bundle install. Single Sign On Appliances (SSOA) Solution - IP Providers Solution In this video we will learn how to integrate Certificate Authority (CA) to a Framework to provide SSO for applications. published: 06 Aug 2017 EXEFST Patching Engine v.1 EXEFST is a patching engine for

Windows operating system, allowing to implement changes into existing applications (multiple versions of the same application in one instance of the operating system). The engine allows to switch application configuration between debug and production mode and to reload of the patch only the executable section (portable applications); other sections can be left untouched. The patch can be applied in offline mode or automatically applying a next patch, if any, will be online. Every time the executable module is updated, the whole patch will be updated on its own without affecting other modules of the application (online mode). Internally, the patch engine uses appcompat library to modify application resources. ITC Media Studios (ITCM) is an ITESP Media company, that connects people and businesses to some of the best IT Content around the world. What's New In ExeRunner?

ExeRunner is a command line application to run WiX installer commands. It is designed to run on one or more computers that are part of a burn bundle. Lets say you want to check how it installs the bundle installer. In this case you can use the command line app and enter the following command: ExeRunner -u If you want to check how the bundle installer creates the folders on a given folder, you can enter the following command: ExeRunner -u -f Installer.msi -s "{path}\\bundle" This app is useful to check if a given WiX project builds with the right parameters when it's imported on a Burn XML project. To show the list of WiX commands that can be run from the command line, you can enter the following command: ExeRunner -h See the list of WiX commands with the option -h for help. If you need to create a log file from the WiX installation with the command, you can enter the following command: ExeRunner -u -f Installer.msi -s "{path}\\bundle" -d "c:\Logs\\installer.log" If you need to check the errors in the log, you can enter the following command: ExeRunner -u -f Installer.msi -s "{path}\\bundle" -d "c:\Logs\\installer.log" -v If you want to check how the bundle installer builds for the given command line with the given parameters, you can enter the following command: ExeRunner -u -f Installer.msi -s "{path}\\bundle" -d "c:\Logs\\installer.log" Other examples: - v: this runs the WiX packaging tool to generate a log file containing the directory info for the application - -d: this runs the WiX packaging tool to generate a log file containing the directory info for the application - -v: this runs the WiX packaging tool to generate a log file containing

System Requirements:

Windows: Mac OS X 10.7 (Lion) or later Screen Resolution at least 1024x768 Intel GMA 950, GMA X4500, GMA X4500HD, GMA X4500HDB, GMA X4500HDTV, GMA X4500HDTV + GMA X4500HDTV + ATI GMA X4500 HDTV or any high-end Intel HD Graphics GPU or later Or NVIDIA GPU with CUDA 1.2+ Compiler DirectX 9,
